

Evidence 4 Faith biologist teaches about fossils and dinosaurs to the next generation at West Bend Community Church.

Seniors and homeschoolers

We had two events involving seniors and homeschoolers this month. The first one was at Community Church in West Bend. We began with a session for almost 70 seniors (Young Hearts 50+) followed by a luncheon. Using the culture of the time, I taught them about being a hot, cold, or lukewarm Christian from Revelation 3. (We plan to record this message soon since I have used it so often.) When they were asked if they learned anything new, most of them raised their hands. Following that, we held a 90-minute session for homeschool families. There were 80 kids and 32 adults. I taught them about dinosaurs and fossils including a hands-on project. Explaining how fossils are formed provides evidence for the flood. Two people remarked that what I presented changed their views on creation. The second event took place at Faith EV Free in Woodruff. There were more than 80 in attendance for the Friends in Fellowship monthly get together. I shared with them part of our “David & The Giants” video series that just premiered last Wednesday (you can preview these videos on Youtube). Some students from a local homeschool group joined us. The kids and adults both went nuts over the artifacts I brought. The adults raved about what I taught and requested to have me back again.

I had the privilege to teach the TruNorth students at Fort Wilderness. TruNorth is a gap year leadership and discipleship program. The classes included how we got the Bible, Bible translations, why there are 4 gospels, and God’s view on dating. (The same ones I typically do for college age students.) Many of them expressed that the class on Bible translations was one of the most useful classes they’ve ever had. New Bibles were going on most of their Christmas wish lists. :)
